

Megan Vargo

5th Grade Faculty

Megan Vargo graduated in 2011 from Westminster College with a Bachelor's in Elementary Education with a Special Education Minor. She went back to school after teaching for 7 years and graduated with a Masters in Mathematics Education from Western Governors University in 2019. Megan started teaching in 2011 in Granite School District during her 8 years there she taught as a Special Education Teacher for a self-Contained K-3 Behavior Unit and Kindergarten.

She was drawn to education at a young age when her younger brother struggled with reading and needed additional help. What really ignited and drew Megan was her time in a reading tutoring program in her first year of college. She worked with 4th and 5th-grade students that struggled with reading and when they made progress they lit up with delight that they finally got it. The thing that Megan loves most about St. Francis is the love and camaraderie that everyone exhibits.
